TRAMEX REMOTE ENVIRONMENTAL MONITORING SYSTEM TREMS-Xtra

The Tramex Remote Environmental Monitoring System Xtra has been designed and developed by Tramex for professionals who depend on the most accurate, reliable, real-time building environment temperature and relative humidity readings using state of the art technology to respond quickly to environmental changes and notify users. The TREMS-Xtra comprises a Tramex Cloud Station router, 5 CS-RHTX Tramex Cloud Sensors for ambient conditions, as well as 5 external Relative Humidity probes. These external probes extend the benefits of the remote monitoring system allowing for in-situ readings within building structures cavities in walls and ceilings and in situ RH readings in concrete.

Multiple Sensors can be used with one Station and additional sensor Accessory Packs are also available. Registration and on-site set-up is simple using a QR code check-in procedure. The on-site Sensors, with battery life of up to 15 years, transmit relative humidity, temperature (°C and °F), dew point and grains per pound / grams per kilo readings wirelessly via the Tramex Cloud Station enabling remote monitoring of up to 200 on-site Sensors on the Tramex Cloud platform.

Tramex Cloud is a secure platform to store and report your moisture, temperature and relative humidity measurements, get notified of adverse conditions and quickly monitor status from any browser. There are no subscription fees and there is free data with the Tramex Remote Environmental Monitoring System.

KIT CONTENTS

- 1.5 x CS-RHTX Tramex Cloud Sensors
- 2. 5 x external Relative Humidity probes for in-situ
- 3.1 x Tramex Cloud Station

- 4. 1 x Heavy Duty Protective Carry Case
- 5. Tramex Cloud Software Monitoring platform (Tablet not included)
- 6. Antennae for Cloud Station

RH, T, DP, gr/lb

IN SITU

RH, T, DP, gr/lb

Product Code: TREMS-Xtra

RELATIVE HUMIDITY SENSOR

This 4.5" (100mm) sensor can be used for the evaluation of moisture conditions within building materials, walls and cavity structures within the building envelope. It can also be used with the Tramex Hygrohood for non-destructive Relative Humidity testing of concrete and other cementitious materials.
